RE: Support Passage of the Kids Online Safety Act

Dear Speaker, Majority Leader, Minority Leaders, and Chairs

We, the undersigned Attorneys General, as the chief legal officers of our states, write in support of the bipartisan Kids Online Safety Act (“KOSA”). While an increasingly online world has improved many aspects of our material well-being, prolific internet usage negatively impacts our children—with some studies suggesting minors spend over 5 hours daily on the internet. KOSA will establish better safeguards for minors online.

We are acutely aware of the threats minors face on social media. Many social media platforms target minors, resulting in a national youth mental health catastrophe. These platforms make their products addictive to minor users, and then profit from selling minor user data to advertisers. These platforms fail to disclose the addicting nature of their products, nor the harms associated with increased social media use. Instead, minor users receive endless tailored and toxic content. Further, increasing evidence suggests these platforms are aware of the negative mental health effects social media burdens its underage users with, but choose to continue these

practices. This is why many of our Offices commenced investigations and lawsuits against Meta and TikTok for harming minors.

We encourage Congress to act to aid our state-level efforts. KOSA addresses these threats to our children in several ways. First, KOSA mandates social media platforms enable their strongest safety settings by default, rather than requiring minors to opt-in to additional protections. Second, KOSA permits minors and their parents or guardians to disable the most addictive product features and grants the choice to opt out of algorithmic recommendations. Third, KOSA equips parents with new controls to support their children and identify harmful behaviors, as well as improved reporting capabilities.

This is a great improvement over the earlier version that did not provide for state enforcement. The states have been consistently acting to vigorously protect kids from online dangers using their existing consumer protection authority, and we look forward to further collaboration. These changes will help create a safer online environment that reduces harm to kids. We respectfully encourage you to pass KOSA¹ this year.

Sincerely,

Jonathan Skrmetti
Tennessee Attorney General & Reporter

Alabama Attorney General

Arkansas Attorney General

¹ Many of the States understand that there are multiple draft versions of KOSA. Congress should pass a version of KOSA that would not prohibit a State from enacting a law, rule, or regulation that provides greater protection to minors than the protection provided by the provisions of this title.
